PROFESSIONAL PROFILE

Mechanical engineering student at Sacramento State University with a strong foundation in Manufacturing, Industrial applications and hands on projects, seeking a full time summer internship for 2026 and a career after graduating in fall of 2026 in the industrial automation space or product engineering. Experience in machine maintenance, 3D Printing, CAD/CAM software and in leadership as a club president of the Sierra College Motorsports Club. Additionally proficient in Macro Business Economics, rapid prototyping, Klipper coding and project management from a personal business venture that I served as CDO of.

QUALIFICATIONS AND SKILLS (Confidence)

- AutoCAD(3/5), Solidworks(2/5) and Fusion360(4/5)
- 3D Printing(5/5) and Rapid prototyping(5/5)
- old Bridgeport Lathe(3/5), Milling(3/5) and Haas CNC (3/5)
- Klipper(4/5), Java(2/5), python(3/5), Matlab(2/5) and C(2/5)
- Leadership and Project Management(4/5)
- Ex Business Owner

ACADEMIC PROJECTS

SIERRA COLLEGE MOTORSPORTS CLUB

MAY 2023 - DECEMBER 2024

Treasurer, Vice President, to President

- Created and executed a plan to get a \$500 Mini Cooper up to standard and race ready for the 24 Hours Of Lemons. Planned out and coordinated race preparations for the team, providing clear instructions on tasks and ensuring all aspects of the vehicle's readiness. Maintained communication channels with drivers during race days to address vehicle performance concerns, offering real-time input and adjustments to ensure peak performance and keep the team calm and composed.
- Made self-funding opportunities that successfully have generated income to fund the race program, including cars and coffee. Additionally, established outreaches that created sponsorships allowing students to attend SEMA and get large discounts for race car parts to reduce the racing expense.

3D PRINTERS

MAY 2019 - PRESENT

Custom 3D Printer Work

- Assembled, customized and coded a Voron 2.4 350mm 3D printer to achieve higher print speeds with a large print volume to serve as a rapid prototyping tool and production tool for my 3D printing consulting work.
- Constructed and enhanced a Prusa Mk4 kit by changing hot end parts and created custom printing profiles. Eventually converted to a Prusa core one to help print more technical parts.
- Converted an Ender 3 Pro into a custom CoreXY high performance cutting edge unit meant to prototype unconventional engineering grade materials

PROFESSIONAL EXPERIENCE

SIERRA COLLEGE MAKERSPACE

APRIL 2023 - DECEMBER 2024

Technical Assistant

- Trained and supported students in the safe operation of 3D printers, CNC routers, embroidery, vinyl cutting, laser engraving and project woodworking.
- Maintained and improved machinery functionality to improve the student experience and helped guide projects while maintaining the safety standards of the Makerspace.

VANQUISH PRODUCTS

JULY 2021 - MARCH 2023

Inventory Manager, Packaging and Deburr Technician

- Oversaw inventory management, ensuring parts were properly processed for anodizing and laser etching.
- Provided flexible support to packaging and shipment departments and deburr during periods of high demand and production.
- Operated machinery to clean, polish, and deburr production parts, maintaining high-quality standards.

EDUCATION AND TRAINING

CALIFORNIA STATE UNIVERSITY, SACRAMENTO

DECEMBER 2024 - CURRENT

BS in Mechanical Engineering **expected graduation fall 2026**
3.358 GPA (Current)

Sacramento, California

SIERRA COLLEGE

JULY 2019 - DECEMBER 2024

Earned AS in Natural Science and AS-T Engineering
2.723 GPA (employed 30-40 hrs a week)

Rocklin, California
